

Terry de Mello, SHEQ Manager

Thanks to Titan LNG we reduced our energy costs and our emissions.

Switching to gas was never an option because access to a pipeline was uneconomic. This left us at the mercy of wildly fluctuating and often high heating oil prices. Add on tightening emissions regulations and you can understand why we are desperate for an alternative cleaner fuel.

Thanks to LNG, we killed two birds with one stone. We reduced our energy costs by more than 30% and we significantly cut our harmful and costly emissions. The conversion to LNG was easy and we have now been using LNG for 4 years without any issues. We are extremely pleased with the service Titan LNG provides us and highly recommend switching to clean natural gas in the form of LNG.”

Tank Service Pernis is a logistic service provider, specialized in cleaning and repair of food and chemical tank containers. TSP is part of the Belgian Begoos group, which operates two locations in the Netherlands (Pernis – Groningen).
