BioLNG for Germany

Titan LNG and Osomo Projects sign Partnership to Construct First BioLNG Production Facility in Germany

Amsterdam, 26.11.2015 - Titan LNG and Osomo Projects sign partnership agreement to realize the first BioLNG production facility in Germany. This partnership enables both companies to bundle their know-how gained in The Netherlands to supply the German market with this pipeline-independent and flexible energy.

BioLNG is liquefied Biogas, produced from local, renewable resources. "BioLNG is sustainable and emits 80% less CO₂ and almost no NO_x, SO_x and particulates - in comparison to Diesel or Heating Oil", comments Ronald van Selm, Operations Director Titan LNG.

Titan LNG will operate the facility, and is responsible for distribution and customer service. Osomo Projects supplies the certified and patented BioLNG technology. Interested large gas consumers are invited to contact Titan LNG.

Titan LNG is a leading supplier for Full-service LNG solutions in Europe. Titan LNG offers turnkey LNG solutions for industrial customers and delivers LNG to the shipping sector.

Osomo Projects is the leading supplier of BioLNG liquefaction equipment in Europe. Osomo Projects represents iLNG, the owner of the certified and patented BioLNG liquefaction technology.
